

**2003 Watershed Inspection Program
Bassett Creek Water Management Commission
August 2002**

1. Erosion Control Inspection

For the 2003 fiscal year, Barr Engineering Co. proposes to continue the current watershed construction site inspection program. The inspections have been valuable for correcting erosion and sediment control practices which are not in conformance with Commission policies. The inspections also verify that sites are developed in accordance with approved plans. The proposed plan consists of inspecting active construction sites in the watershed once every month. Erosion control inspections will begin April 2003 and extend through October 2003. Selected sites may be inspected on two-week intervals to verify that requested erosion control modifications have been completed. Critical work such as wetland or creek crossings and work adjacent to lakes and sensitive wetlands will be inspected as necessary. We recommend Commission staff coordinate the inspection with respective contacts from each city. Following each inspection, a letter listing construction projects and the improvement needed for effective erosion control will be sent to the inspection department at each city where improvements are required.

2. Flood Control Project Inspection

For the 2003 fiscal year, Barr Engineering Co. proposes to implement the flood control project inspection. The inspection program will cover flood control project features designed and constructed by the Corps of Engineers and features designed and constructed by the Commission and cities. The objective of the inspection is to address erosion, settlement, sedimentation, and structural issues. In accordance to the Bassett Creek Flood Control Project Operation and Maintenance Manual, except as noted, the following project features require annual inspection:

Minneapolis

- New Tunnel and Conduit (Double Box Culvert) - inspect every five years, dewater and inspect every 20 years
- Old Tunnel
- Open Channel

2003 Watershed Inspection Program (continued)
Bassett Creek Water Management Commission
August 2002

Golden Valley

- Highway 55 Control Structure & Ponding Area
- Golden Valley Country Club Embankment (Box Culvert, Overflow Weir, and downstream channel)
- Noble Avenue Crossing
- Regent Avenue Crossing
- Westbrook Road Crossing
- Wisconsin Avenue Crossing
- Minnaqua Drive Bridge Removal

Crystal

- Box Culvert and Channel Improvements (Markwood Area)
- Edgewood Embankment with Ponding
- Highway 100/Bassett Creek Park Pond
- 32nd Avenue Crossing
- Brunswick Avenue Crossing
- 34th Avenue Crossing
- Douglas Drive Crossing
- Georgia Avenue Crossing
- 36th-Hampshire Avenue Crossing
- Channel Improvements

Plymouth

- Medicine Lake Outlet Structure
- Plymouth Fish Barrier (not required by Corps)
