PROPOSED REVISIONS Table 5-3 BCWMC 2015-2025 CIP

Gray boxes indicate revised areas including additions (underlined) and deletions (strikeout)

BCWMC ID			Estimated	rrined) and deletions (strikeout) ted Year										
20111110110	<u> </u>	T Toject Description	Capital Cost ^{1,2}	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
SL-8	In-lake alum treatment of Sweeney Lake		\$ 275,000							After 2020- 2023				
SL-9 ⁴	hosphoru	Chemical treatment of inflow to Sweeney Lake from Sweeney Lake Branch of Bassett Creek	\$ 1,000,000								Afte	er 2020- 2023		
SL-10	Projects to address phosphorus load red	Impervious area runoff retention and retrofits, including bioretention, rainwater gardens, and soil restoration (various locations)	\$ 500,000							After 2 020- 2023				
SL-11	Projec	Stormwater treatment system for dissolved phosphorus removal in Golden Valley	\$ 400,000							\$400,000	23			
Twin Lake	<u> </u>													
TW-2 ⁶		um treatment of Twin Lake to reduce hosphorus loading	\$ 160,000											
Bassett Creek	Park Pon	d												
BCP-2	channel in	of Bassett Creek Park Pond and upstream mprovements for water quality treatment to losphorus loading					<u>\$1,000,000</u>			TBD	TBD	TBD	TBD	TBD
Northwood La	ike													
NL-1 ⁷	Northwood Lake Water Quality Project to reduce phosphorus loading		\$ 676,000 \$1,769,070		\$ 676,000	\$676,000 \$1,093,070								
NL-2 ⁸	Four Seasons Mall Area Water Quality Improvements to reduce phosphorus loading		\$ 990,000											
		ntation of water quality improvement projects inded in future Northwood Lake TMDL study								TBD	TBD	TBD	TBD	TBD
Bassett Creek	Main Ster	m												
2015CR-M ⁹		Main Stem channel, 10th Avenue to Duluth olden Valley to reduce phosphorus and loading	\$ 1,503,000	\$ 1,503,000										
2017CR-M ¹⁰	Main Sten	m Channel Restoration, Cedar Lake Road to e to reduce phosphorus and sediment				\$ 400,000	\$400,000 \$664,472							
2021CR-M	Main Sten	m Channel Restoration, Bassett Creek Drive n Valley Road (in Golden Valley) to reduce us and sediment loading				110,000				\$ 500,000		After 20	123	
BC-2/BC-8 ⁻¹¹	Sandburg Improvent Stem Wat	p. Rd. and Louisiana Ave. Water Quality- nent and Flood Reduction Project, Main- tershed (Golden Valley) to reduce- us loading and reduce flooding	\$ 501,000					\$ 201,000	\$ 300,000					
	Regional	lality Improvement Site in Theodore Wirth- Park (Golden Valley) to treat untreated- er runoff to reduce phosphorus and- loading	\$ 1,100,000				\$ 501,000	\$ 599,000						
BC2,3,8, 10		Lake Road and Winnetka Avenue Long od Mitigation Plan Implementation	\$ 2,900,000					\$ 500,000	\$1,100,000		\$300,000	\$1,000,000		

PROPOSED REVISIONS Table 5-3 BCWMC 2015-2025 CIP

Gray boxes indicate revised areas including additions (underlined) and deletions (strikeout)

BCWMC ID	Capital Project Description	Estimated	Year											
BOWING IB	Oupital 1 Toject Bescription	Capital Cost ^{1,2}	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	
BC-4 ¹²	Honeywell Pond Expansion, Main Stem Watershed (Golden Valley) to reduce phosphorus loading and provide water quantity benefits	\$ 1,202,000		\$ 1,202,000										
BC-5 ¹³	Water Quality Improvements (phosphorus reduction) in Bryn Mawr Meadows, Main Stem Watershed (Minneapolis)	\$ 500,000					\$ 500,000							
BC-7	Dredging of accumulated sediment in Main Stem of Bassett Creek just north of Highway 55, Theodore Wirth Regional Park, to reduce phosphorus loading and improve habitat	\$ 400,000							\$ 400,000					
BC-9	Restoration and stabilization of historic Bassett Creek channel, Main Stem Watershed (Minneapolis) to reduce phosphorus and sediment loading	\$ 500,000						\$ 500,000		<u>\$500,000</u>				
Westwood La	ke													
WST-2	Westwood Lake Water Quality Improvement Project in Westwood Hills Nature Center	\$300,000					\$300,000							
Parkers Lake	Parkers Lake													
<u>PL-7</u>	Parkers Lake Drainage Improvement Project to reduce erosion, suspended solids, and total phosphorus to Pakers Lake	<u>\$400,000</u>							<u>\$200,000</u>	\$200,000				
Crane Lake	·													
CL-3 ¹⁴	Retention of impervious area drainage at Ridgedale area (e.g., bioswales, tree trenches, rain gardens) to reduce phosphorus laoding								TBD	TBD	TBD	TBD	TBD	
Notoe	Total Annual Estimated Cost ¹⁵	\$31,395,00 0 \$35,239,115	\$1,503,000	\$1,878,000	-\$400,000 \$2,074,000	- 1301000 \$1,947,115		\$1,300,000	\$1,300,000	TBD \$1,200,000	TBD \$1,300,000			

Notes:

TBD = To be determined, usually at the time the project is listed in the working (5-year) CIP.

- 1. Project costs presented in 2015 dollars.
- 2. Estimated costs are from TMDL studies or from BCWMC 2017-2021 working CIP; as projects are added to the CIP, preliminary cost estimates will be added to the 5-year working CIP and refined through the feasibility study process.
- 3. ML-14: Project may include lakeshore restoration projects administered by the BCWMC. The City of Plymouth has already performed lakeshore restoration on some properties adjacent to Medicine Lake.
- 4. Estimated cost of projects ML-19 and SL-9 do not include the annual cost of chemical precipitant and operation/maintenance of treatment facility.
- 5. 2017CR-P: Project is based on recommednations in the 2009 Plymouth Creek Restoration feasibility study. Changes in figures reflect updated estimates
- 6. SL-3 and TW-2: Projects already levied, to be constructed in 2015.
- 7. NL-1: Project based on Option 4 of the 1996 Northwood Lake Watershed and Lake Management Plan. Project includes construction of a pond upstream of Northwood Lake and installation of underground stormwater treatment and reuse system, and bioinfiltration cells. Changes in figures reflect actual costs.
- 8. NL-2: The Four Seasons Mall Area Water Quality Project could include construction of stormwater treatment ponds,-restoration of an eroding stream channel, alum treatment of stormwater, or other projects to address phosphorus loading. The projects stem from recommendations from the 1996 Northwood Lake Watershed and Lake Management Plan. The 2012 feasibility study for the Four Seasons Mall Area Water Quality Project is still being considered and refined. The BCWMC has already levied for the project defined as option 1 in the 2012 feasibility study.

by BCWMC closed project account; to be constructed in 2015.

- 10. 2017CR-M: Project is based on recommendations in the Feasibility Study for 2012 Bassett Creek Main Stem Restoration Project (2011). Changes in figures reflect updated estimates.
- 11. BC-2/BC-8: Option 2 BC-HH1111-1 and Option 3 BC-HH11-1 in the Bassett Creek Main Stem Watershed Management Plan (2000).
- 12. BC-4: Project would divert currently untreated stormwater runoff to the pond.
- 13. BC-5: Project based on Option 7 in the Bassett Creek Main Stem Watershed Management Plan to treat currently untreated stormwater runoff to reduce phosphorus loading.
- 14. CL-3: Project is based on recommendations in the Crane Lake Watershed and Lake Management Plan (1995).
- 15. Includes estimated costs for projects not yet assigned an implementation year. Annual Estimated Costs do not necessarily reflect actual Hennepin County levy amount due to grants, financial contributions from cities, and use of CIP fund balance.
