Technical Advisory Committee Meeting

Monday July 8, 2019

1:00 – 3:00 p.m.

Council Conference Room, Golden Valley City Hall

1. CALL TO ORDER

2. COMMUNICATIONS

3. BUSINESS

A. Continue Discussions and Review Commission Engineer's Recommendations Memo on Stormwater Manufactured Treatment Devices; Develop Recommendation for Commission

At their April 18, 2019 meeting, the BCWMC directed the TAC to provide direction to the Commission and BCWMC Engineer regarding review and acceptance of proprietary stormwater manufactured treatment devices (MTDs) proposed for use in development/redevelopment projects in the watershed.

The TAC met on May 29th and began discussing this issue. The TAC developed one recommendation regarding cooperating with other watersheds to advocate that MPCA test MTDs for inclusion in the MN Stormwater Manual. This recommendation was approved at the June 20th Commission meeting.

The TAC should review the attached technical memo and consider the Commission Engineer's recommendations.

4. ADJOURNMENT
