

Bassett Creek Watershed Management Commission

Technical Advisory Committee Meeting

Wednesday, June 4, 2025

10:30 a.m. – 12:00 p.m.

Wirth Lake Room, Brookview

1. CALL TO ORDER, INTRODUCTIONS

2. COMMUNICATIONS & UPDATES

3. BUSINESS

A. REVIEW INITIAL RESULTS FROM STREET SWEEPING PRIORITIZATION ANALYSIS - items included with meeting materials

Commission Engineers have compiled results from the street sweeping survey and completed the first steps in the street sweeping analysis. Results to-date show that cities within the BCWMC vary in how and if they are currently performing enhanced street sweeping as a water quality improvement practice. Commission Engineers will share draft results from the street sweeping analysis, which includes highlighting areas within the BCWMC to consider for prioritizing street sweeping investments.

The TAC should review the initial draft survey results (included with meeting materials) and identify any adjustments needed to reflect each city's operations.

Street sweeping zones (maps) are also included with meeting materials for review prior to the meeting.

Commission Engineers will also be seeking input on a few different options in methods for identifying priority areas.

B. UPDATES ON WATERSHED PLAN DEVELOPMENT, OUTREACH, PLAN TAC MEETING

TAC members should provide updates on any outreach conducted or feedback received so far, or any ideas for additional communication with member city leadership or residents. Additionally, a reminder that a virtual Plan TAC meeting is set for June 10th at 1:30 p.m.

4. NEXT MEETING – To be determined

5. ADJOURN
